

Assignment 1

1. write hello world code using java.

```

public class Main {
    public static void main (String[] args) {
        System.out.println ("Hello, Java world!");
    }
}

```

2. Variables & Data types

```

public class variables {
    public static void main (String[] args) {

        int age = 20;
        double salary = 800.50;
        boolean isStudent = true;
        char grade = 'B';
        String name = "Ram";

        System.out.println ("Age: " + age);
        System.out.println ("Salary: " + salary);
        System.out.println ("Student: " + isStudent);
        System.out.println ("Grade: " + grade);
        System.out.println ("Name: " + name);
    }
}

```

3. Operator program

```
public class operators {  
    public static void main (String[] args) {
```

```
        int a = 10;
```

```
        int b = 5;
```

```
        System.out.println("Addition: " + (a+b));
```

```
        System.out.println("Subtraction: " + (a-b));
```

```
        System.out.println("Multiplication: " + (a*b));
```

```
        System.out.println("Division: " + (a/b));
```

```
        System.out.println("Modulus" + (a%b));
```

Relational operators

```
        System.out.println(a > b);
```

```
        System.out.println(a < b);
```

```
        System.out.println(a == b);
```

```
        System.out.println(a != b);
```

Logical operators

```
        System.out.println((a > b) && (b > 0));
```

```
        System.out.println((a < b) || (b > 0));
```

```
        System.out.println(!(a < b));
```

```
    }
```

4. User Input program

```
import java.util.Scanner;
```

```
public class User Input {
```

```
    public static void main (String[] args) {
```

```
Scanner sc = new Scanner (System.in);
```

```
System.out.print ("Enter first name number:");  
int num1 = sc.nextInt();
```

```
System.out.print ("Enter second number:");  
int num2 = sc.nextInt();
```

```
int sum = num1 + num2;
```

```
System.out.println ("sum=" + sum);
```

```
sc.close();
```

```
}  
}
```

IntelliJ IDEA interface showing a Java project named "java" with a file structure on the left and a code editor on the right.

Project Structure:

- java C:\Users\ASUS\IdeaProjects\java

 - Scratches and Consoles

Code Editor (UserInput.java):

```
1 import java.util.Scanner;
2
3 public class UserInput { new *
4     public static void main(String[] args) { new *
5
6         Scanner sc = new Scanner(System.in);
7
8         System.out.print("Enter first number: ");
9         int num1 = sc.nextInt();
10
11        System.out.print("Enter second number: ");
12        int num2 = sc.nextInt();
13
14        int sum = num1 + num2;
15
16        System.out.println("Sum = " + sum);
17
18        sc.close();
19    }
20 }
```

Run Console:

```
C:\Users\ASUS\.jdk\openjdk-26.0.1\bin\java.exe "-javaagent:C:\Program Files\JetBrains\IntelliJ IDEA 2026.1.1\lib\ide
Enter first number: 10
Enter second number: 20
Sum = 30
Process finished with exit code 0
```
